WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural, Automotive and Creative Technology.

Our mission is to change our surroundings and improve our world. We work towards our Vision which is based on the strong belief in our long-held values: sincere and ethical culture, commitment to safety and technology and respect for people.

THE ROLE

We are seeking a Lead Developer to provide technical leadership for our in-house production system that integrates with SAP and factory PLCs. The system delivers real-time data to dashboards and supports end-to-end production processes (loading, netting, scrapping, goods receipt).

The Lead Developer will act as the technical authority for the development team, ensuring best practices in design, development, testing, and deployment. They will mentor the team, collaborate with business users, and drive the future technical roadmap of our systems. Together with our experienced team, they will contribute to multiple high-profile projects simultaneously, with business sponsors from different regions. They will maintain up-to-date knowledge of relevant technologies and evolving trends to ensure the team is constantly maturing.

WHAT ARE WE LOOKING FOR?

You and your Skills

- Degree in an IT discipline or equivalent industry experience.
- Technical leadership and mentoring skills.
- Excellent communication skills.
- Strategic thinker with attention to detail.
- Proven experience as a Senior/Lead Developer in enterprise systems.
