## II. Background

The Group has revised its forecast of revenue and operating profit upwards, reflecting the Q3 cumulative performance which was better than previously expected.

The favorable performance was largely driven by higher sales prices, especially in the Group's architectural and automotive glass businesses, and also generally better sales volumes in Q3 than previously forecast, mitigating the impact of input cost increases.

The forecast for the loss before taxation further reflects strengthening results at the Group's joint ventures and associates, partly offset by an increase in financial costs. The loss for the period also reflects an increased taxation cost.

The Group will continue to promote the key initiative of "Restoration of financial stability" in RP24.

## Forecast for Financial Year ending 31 March 2023

Full-year forecast revised upward based on relatively strong cumulative performance. Loss before taxation, loss for the period and net loss also improved
