II. Background

The Group has revised its forecasts of operating profit, profit before taxation, profit for the period, and profit attributable to owners of the parent, for both the first half of the year and the full-year, reflecting the Q1 cumulative performance which was below the Group's previous expectations.

The reduced profitability was largely arising in the Group's European architectural business, where the continued economic slowdown has been reflected in reduced glass volumes and prices.

The Group will take any appropriate actions to improve its profits, including further cost reductions throughout the Group and the early closure of a float line in Germany, as announced on 19 March 2024, to improve the demand and supply situation in Europe.
