WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural, Automotive and Creative Technology.

Our mission is to be the global leader in innovative high-performance glass and glazing solutions, working safely and ethically with a vision of **"Changing our Surroundings, Improving our World"**

THE ROLE:

We currently have a vacancy for a Manufacturing Graduate based across the North-West Glass Manufacturing sites, Greengate, Cowley Hill and Watson Street.

You will initially be involved in an exciting new project which will produce the Pilkington Textured range at Greengate, by linking a new automated Rolled Plate line onto the current furnace. This project has received substantial company and government funding and is a significant step in achieving sustainability by giving a reduction in our carbon footprint and energy costs.

There will be opportunities to get involved with both the installation and commissioning of the new line. This will involve working effectively with the manufacturing and engineering teams to ensure all targets are met.

In the longer-term you will work as part of the float operational team in all aspects of plant operations (Float, Textured and Offline Coating), ensuring that plant and equipment operate at maximum efficiency.

This is an opportunity to work in a challenging environment and to contribute to our future strategy of 'four D's': **D**ecarbonization, **D**igital, **P**roduct and Business **D**evelopment and **D**iversity.

The successful candidate will be expected to work as part of multi-disciplinary teams and will require an enthusiastic and flexible attitude, a high level of motivation and a keenness to learn.

Above all we want candidates to be passionate, with a desire to fully learn and develop themselves and their colleagues.

WHAT ARE WE LOOKING FOR?

You and your skills

The successful candidate will....

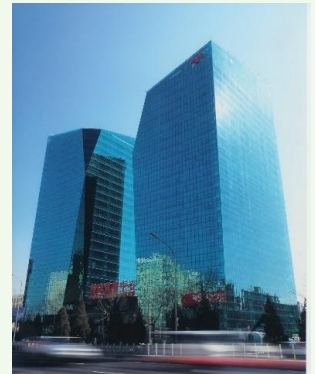

- have a Science or Engineering related degree, 2:1 or above
- be a great team player
- have excellent communication and interpersonal skills
- be Health & safety conscious, who strives to ensure a safe working environment for themselves and the people around them
- have a result orientated approach

You will have a mentor assigned to you who will be supporting your career progression and be a trusted partner for you both professionally and personally.

NSG has a goal to achieve carbon neutrality by 2050 and has a carbon reduction target to achieve a 30% reduction for GHG emissions from the manufacturing processes by 2030.

We are committed to building a truly inclusive and equitable working environment where we can all feel able to be our true selves.

If you believe you can take on the challenge, we very much want to hear from you via our [online application form](#). Please visit our [website](#) for further details.

Benefits

- 25 days holiday plus bank holidays
- Six monthly salary review
- Pension with employer contribution
- Staff Incentive scheme
- Flexible Working
- Continual Professional development
