## WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural, Automotive and Technical Glass.

Our mission is to be the global leader in innovative high-performance glass and glazing solutions, working safely and ethically.

## THE ROLE

Architectural Engineering provides a total project engineering service for capital projects on behalf of NSG Group and client companies worldwide. This service covers all aspects of the project from feasibility, specification, design and procurement to installation and commissioning. Projects vary between the build of a new factory on a Greenfield site to a major overhaul of an existing plant.

A vacancy has arisen for a Senior Civil / Structural Engineer within Architectural Engineering. Travel is an integral part of the role and will consist of both short design trips as well as trips of around 6 weeks at a time supporting the construction and installation phases.

The main features of the role are to carry out:-

- the feasibility study work, CAPEX estimating, planning & project development for civil and structural engineering projects.
- the outline design and plant layout work, civil design services contract procurement work, technical query and contract management, and on-site construction management & inspection for civil and structural engineering works.
- technical consultancy for the group manufacturing facilities around the world for civil and structural problems

## WHAT ARE WE LOOKING FOR? "You and Your Technical Skills"

### Knowledge and experience of :-

- Geotechnics and Foundations design
- Reinforced Concrete and Structural Steel design
- Roads and drainage design
- Bulk Earthworks
- Preparation of Bills of measurement
- Internal building services (Lighting, HVAC, etc)
- Internal fit-out and finishing
- Inspection of on-site construction
- Preparation of budgets for design and construction elements
- Management of internal and external resources/contractors from feasibility to detailed design and then construction phases

## SKILLS / QUALIFICATIONS

- Chartered Engineer Status with Institution of Civil Engineers (ICE) or Institution of Structural Engineers (IStructE)
- Applicants educated to Masters degree level in Civil Engineering and working toward Chartered Status shall also be considered.
- Skilled in working with multi-disciplinary teams
- Skilled in working internationally within multi-cultural teams
- Skilled at effective prioritization of projects and tasks to ensure delivery on time and within budget
- Pro-active and able to work on own initiative, ready to identify problems and quickly report them / provide solutions
- An ability to work under pressure and to tight timescales
- Exceptional interpersonal and team-working skills with a natural enthusiasm and conscientious approach
- Self - starter who drives for results

## Benefits

- 25 days holiday per annum plus declared public holidays
- Holiday Purchase Scheme (purchase up to 5 additional days per year)
- Flexible working (office and home)
- Private Healthcare Plan
- Management Bonus Scheme – pays up to 20% of basic salary, based on business targets and not guaranteed
- Additional remuneration for overseas work (if over 14 consecutive midnights)
- Group Personal Pension Plan – a defined contribution scheme with Aviva with up to 8% employer contribution
- On site car parking & EV charging
- Canteen facilities on site
- 4 weeks accommodation, if applicable

A full UK driving licence and car ownership would be an advantage due to limited public transport to the site.

*If you believe you have the skills and abilities we need, and there is a match between our profile and your aspirations, we very much want to hear from you!*
